## NOT JUST PLANTING CHURCHES . . . . IT'S MULTIPLICATION!!

We are in the ministry of planting churches and it is gratifying to see the number of churches that have been raised up during the years that we have been laboring in Colombia – we know that would not have been possible without faithful sponsoring churches –and individuals who love God’s work as we do.

After all these years, we are seeing another phenomenon. The churches that we have helped raise up are starting DAUGHTER CHURCHES. Note the picture of my wife Aldonna ministering in the church at Piedecuesta (Bucaramanga) a church now of a thousand in attendance and that has birthed eighteen daughter churches. Note as well, the picture of Pastor Nelso Medina and myself in the construction of their new church that will seat 800. They are not only building, but are getting ready to start their seventh daughter church. These are not the only ones, there are many other churches also that we have helped start, doing multiple church plants and becoming involved in the vision of extending Christ’s Church!

There are other aspects of multiplication process too—Note the picture of Larry Gruetzmacher teaching the first level class of our NINTH church planting “Boot Camp”, training workers to raise up new churches.

The other picture shows some of the pastors I am currently MENTORING in advanced techniques of church planting and growth.

The church is multiplying because of people like you! God bless you richly!

Blessings!
